Professional Summary

Backend-focused Software Developer with **3 years** of experience building and maintaining enterprise web applications in **PHP (CodeIgniter)** and **Python (Flask)**. Delivered 5+ live systems across healthcare, HRMS, and finance, including a clinical pre-authorization platform, a 5-level invoice approval portal, and an enterprise HRMS. Strong in RESTful API development, MySQL query optimization, Role-Based Access Control (RBAC), approval-workflow design, and Linux production deployment. Seeking a Backend or Full-Stack Developer role to build scalable, high-impact products.

Technical Skills

Backend: PHP, CodeIgniter, Python, Flask, RESTful APIs, Third-Party API Integration, RBAC, Multi-Level Approval Workflows
Database: MySQL, SQL, Schema Design, Indexing, Query Optimization, Complex Joins
Frontend: JavaScript, jQuery, AJAX, HTML5, CSS3, Bootstrap
DevOps & Tools: Linux, Production Deployment, Server Monitoring, Git, GitHub
CMS: WordPress (Custom Themes and Plugins), SEO, Performance Optimization
Integrations & Reporting: Excel/PDF/ZIP Export, Automated Email Notifications, Chrome Extension (Python)
Domain: Healthcare IT (ACO, MSO, Pre-Authorization, EDI), HRMS, Invoice and Finance Platforms
Familiar With: React.js, Node.js

Work Experience

Software Developer, AaNine Healthcare Solutions Pvt. Ltd., Chennai Oct 2023 – Present

- Built and maintain **3 production platforms** (TheHub HRMS, eAuthoraiz, FINTRACK) used daily by clinical, finance, and executive teams across multiple departments.
- Developed backend systems in **PHP (CodeIgniter)** and **Python (Flask)** for pre-authorization pipelines, multi-level financial approvals, and end-to-end HR lifecycle management.
- Designed and tuned **MySQL** databases with indexing, complex multi-table queries, and performance optimization to handle high-volume transactional data.
- Implemented **Role-Based Access Control (RBAC)** and multi-level approval workflows to give operational, financial, and executive users secure, structured access.
- Built and integrated **RESTful APIs** with third-party services to automate data exchange, reporting pipelines, and cross-module communication.
- Created a **Python-based Chrome Extension** that automated repetitive internal workflows and cut manual processing effort for the operations team.
- Managed **Linux production deployments**; kept applications stable through monitoring, debugging, testing, and fast issue resolution.
- Customized **WordPress** themes and plugins for healthcare websites, improving performance, SEO, and content management.
- Used **Git & GitHub** for version control and cross-team collaboration across all projects.

Projects

eAuthoraiz – Healthcare Authorization System Live Demo

Python, Flask, MySQL, REST API, JavaScript

- Built a production platform for pre-scrubbing, order processing, and insurance validation, used daily by clinical operations teams.
- Developed Orders and Pre-Scrubbing modules with filtering by date range and submission type (Manual, Fax, API, EDI) and real-time search across large patient datasets.
- Designed live dashboards showing patient, provider, insurance, and authorization status with NPI, CPT, and insurance validation indicators.
- Automated validation and status tracking, reducing manual steps in authorization processing.

FINTRACK – Invoice Management Portal Live Demo

PHP, CodeIgniter, MySQL, PDF/Excel Export

- Developed an invoice management system for client invoicing and financial approvals at a healthcare organization.
- Implemented a **5-level role-based approval chain** (Business Team, Invoice Team, CEO, Billing, CFO) with automated status transitions and email notifications at each stage.
- Built invoice generation, monthly client-wise invoicing, and real-time status tracking modules.
- Delivered **Excel export, PDF invoice generation, and bulk ZIP download**, plus executive dashboards for invoice amounts, discounts, pending balances, and attachment status.

TheHub Portal – Enterprise HRMS & Operations Live Demo

PHP, MySQL, jQuery, AJAX

- Designed and developed a centralized enterprise web application for HR, healthcare operations, and organizational workflows across multiple departments.
- Built **HRMS modules**: employee records, attendance, leave management, training programs, and interview candidate lifecycle management.
- Developed **ACO and MSO** healthcare modules for internal tracking and compliance reporting.
- Added real-time dashboards, RBAC, Quiz Craft assessments, and automated email notifications to improve team efficiency.

AaNine Healthcare Corporate Website Live Demo

WordPress, HTML5, CSS3, JavaScript

- Built a responsive, SEO-optimized corporate website with fast load times and clear service presentation for business clients.

Powerhealth ACO Website Live Demo

WordPress, HTML5, CSS3, JavaScript

- Built an accessibility-focused healthcare website that makes services clearer and improves engagement for ACO patients and partner organizations.

Education

Master of Computer Applications (MCA), Periyar University 2021 – 2023
GPA: 8.4 / 10.0

B.Sc. Software & Computer Science, SIASC, Thiruvalluvar University 2018 – 2021
GPA: 8.3 / 10.0
